

...the CURATIVE POWER of the HARDEST CIRCUMSTANCES...

The brand of U-Project, which transfer the professional experience of the health sector to the area via innovational attitude since 1969, conduct various projects about mobile operating theater and mobile hospitals which include all departments with 150 bed capacity by the mobile health solutions.

While the exceptional circumstances such as natural disasters and wars, the initial purpose of U-Project is generating innovative, rapid, flexible, practical and effective solutions which provide meeting the requirements according to international quality standard.

U-Project conducts environmentally-conscious projects by medical equipment which is envisaged via steps of process demonstrated below according to user requirements. The system designs are in accordance with the standards of land, sea, air and railway transportation and they are appropriate for easy montage and disassembly. Our projects are supported by consultancy and training services due to our expertness on the hospital processes.

- U- Product
- U- Equipment
- U- Mobility
- U- Management

The products, which are used for implementation of expandable containers and specific tents, are main structure products. The core competences of U-Projects are designing and producing these products via the most developed and latest methods. With expandable container it is founded a solution in defence, health, energy etc. sector according to the needs and with inflatable tents it is provided services in the field of health, activity, storage, decontamination etc.

The essential principle of U-Project is creating awareness for our sphere of civil and military activities and making preparations for unexpected, hard conditions.

Best regards.
